WHAT IS THE IFLA TREND REPORT?

In the global information environment, time moves quickly and there’s an abundance of commentators trying to keep up. With each new technological development, a new report emerges assessing its impact on different sectors of society. The IFLA Trend Report takes a broader approach and identifies five high level trends shaping the information society, spanning access to education, privacy, civic engagement and transformation. Its findings reflect a year’s consultation with a range of experts and stakeholders from different disciplines to map broader societal changes occurring, or likely to occur in the information environment.

The IFLA Trend Report is more than a single document – it is a selection of resources to help you understand where libraries fit into a changing society.

DISCOVER THE TRENDS

Our information environment is constantly changing. How will we access, use and benefit from information in an increasingly hyper-connected world? The IFLA Trend Report identifies five top level trends which will play a key role in shaping our future information ecosystem:

**TREND 1**
New Technologies will both expand and limit who has access to information.

**TREND 2**
Online Education will democratise and disrupt global learning.

**TREND 3**
The boundaries of privacy and data protection will be redefined.

**TREND 4**
Hyper-connected societies will listen to and empower new voices.
